

Cybersecurity Docket's Incident Response Forum 2016

MARCH 31, 2016

The inaugural Incident Response Forum 2016 is the first conference of its kind, focusing solely on the field of incident response-the work that begins after a data breach. The day-long program is geared specifically for the legal and compliance professionals who have emerged as critical players during a data breach response. Speakers will cover topics including the legal and compliance aftermath of a data breach, the role of legal professionals, the broad range of state and federal regulatory issues and the tactics and strategies encountered during an incident response, among others.

WilmerHale Partner Ben Powell will be a featured speaker during the conference.
