

## FCA Litigation: Leveraging Statistical Sampling and Extrapolation to Prove or Disprove Liability

FEBRUARY 1, 2017

This Strafford CLE webinar will provide guidance on the use of statistical sampling and extrapolation in False Claims Act (FCA) litigation. The panel will examine how courts are treating the issue and offer best practices for addressing sampling issues. Listen as an authoritative panel of healthcare attorneys examines how statistical sampling and extrapolation are used to (dis)prove liability in FCA litigation. The panel will also examine how different courts have treated statistical sampling and extrapolation and offer best practices for leveraging sampling or combating it in the determination of liability and damages.

WilmerHale Counsel Matthew Benedetto is a panelist.
