

## AWEA WINDPOWER: Powering Forward to Reach New Heights

MAY 7-10, 2018

MCCORMICK PLACE CONVENTION CENTER

Wind power continues to lift the American economy. The industry closed 2017 strong, delivering 7,017 megawatts (MW) of new wind power capacity. That new capacity represents \$11 billion in new private investment. There are now 89,077 MW of wind power installed across 41 states, enough to power 26 million American homes.

The wind industry is powering forward to continue growth into 2018 and beyond. WINDPOWER is where the industry comes together to plan for the future and keep this success story growing. Join other wind industry leaders at the largest wind energy event in the Western Hemisphere.

WilmerHale Special Counsel David Gold will speak on the session "Offshore Wind PPAs: Trends in Deal Terms" and Counsel Raya Treiser will speak on the session "e-POSTER: Like the Wind: Streamlining Federal Permitting."
