

## Emerging From the Laboratory: Challenges Faced by Biotechnology and Other Healthcare Companies in Bringing their Discoveries to Market

OCTOBER 21, 2003

This panel presentation will address key legal issues for companies and investors as life sciences products move from the laboratory to the marketplace. We will discuss partnering with large pharmaceutical companies, establishing new companies based on university research, developing a successful patent strategy, understanding patent litigation in the U.S. and Europe and dealing with the FDA. Our goal is to provide common sense advice over a range of disciplines that will be of immediate value to attendees. Hale and Dorr partners David Redlick, Vivian Pratt, Henry Wixon, Robert Barry and David Bassett will be featured speakers at this event.
