

## Executive Compensation: How to Attract, Reward and Retain Key Talent

2006-10-24

Join us for a webcast on October 24 as a distinguished panel from WilmerHale, Ernst & Young LLP, Harvard Business School and J. Robert Scott discuss the findings of the Information Technology and Life Sciences annual compensation surveys of venture-backed technology and life sciences companies. This year, the surveys received nearly 500 responses from venture-backed companies across the United States. The program will also address other timely topics relating to legal and tax issues involving executive compensation and review the correlation between executive compensation and a number of variables, including financing stage, company size in terms of revenue and headcount, founder/non-founder status, industry segment and geography.
