

Hi-Tech Pioneers: Presenting the Region's Top Emerging Companies in Life Science and Technology

WilmerHale, KPMG, Silicon Valley Bank and TWC/NextStage Advisors are excited to continue to partner in a program that presents the tri-state region's top emerging life science and technology companies. Last year's premiere winners were Linguagen Corporation, Octagon Research Solutions, and Quantiva. Once again this year, emerging companies that demonstrate uniqueness, market desirability, a quality management team, funding and technological or market success are encouraged to apply. A panel of industry experts will review all applications and identify four companies as the 2004 Hi-Tech Pioneers. Selected Pioneers will present to a group of leading venture capitalists at a private reception. For immediate consideration as a Hi-Tech Pioneer, please click on the link below and complete the application. Deadline for application submittal is April 12, 2004.
