

MIT Enterprise Forum: Delivering on the Artificial Intelligence (AI) Promise

CAMBRIDGE, MA

Nearly every day there are dramatic new announcements about advances in artificial intelligence (AI) from smarter digital assistants, to driverless cars to innovations affecting every aspect of our lives. Visionaries like Ray Kurzweil predict a world radically changed by AI over the next two decades; pretty heady stuff. Opportunities for AI based entrepreneurial activity are equally limitless. But where do you start, how do you wade into this vast space; how do you begin to identify what to work on and how to move your AI idea from a concept to product? Ideas create a vision of the future but execution makes it happen. This event will feature a panel of pioneering companies working on natural language processing and machine learning who are forging ahead on this path.
