

MIT: Innovation Series: The DNA of Entrepreneurship: Lessons Learned Across the Generations

2008-06-10

Innovation Series are designed to identify and evaluate critical market and business issues for established, funded, and growing science and technology-based companies. At this series, presented by MIT, attendees participated in a fireside chat moderated by technology journalist and editor Doug Banks on how entrepreneurship is born and how it can be passed from parent to progeny and from mentor to mentee.

WilmerHale was a sponsor of this event.
