PitchNSI: Drones and Autonomous Technologies

BOSTON, MA

TandemNSI is going on the road and coming to Boston for its first event outside of Washington DC. Join representatives of The Defense Advanced Research Projects Agency, Department of Homeland Security, Office of Naval Research and others and make connections and show off your ideas and technologies. This event will focus on drones and autonomous technologies and they are looking for innovators at startups, universities, federal labs and high schools. Apply to pitch your technology to the panel of national security agency representatives, or to have a table top to show off your technology to other attendees.

This is a great opportunity to get exposure to many of the national security agencies that most need innovation in drones and autonomous technologies from non-traditional sources. Agencies are actively looking for new innovators every day, and perhaps they are looking for you.
