

Stanford Biodesign Innovation Fellows' Final Presentations

STANFORD, CA

The Biodesign Innovation Fellowship is at the heart of Stanford Biodesign's circle of impact. Each year, the Biodesign Innovation Fellows learn a project-based approach for identifying important healthcare needs, inventing innovative diagnostics, devices or other health technologies to address them, and preparing to bring those products into patient care through startup, corporate or other implementation channels. In addition, they become part of the Stanford Biodesign community, which is a life-long, worldwide network of innovators passionate about improving healthcare.

On April 27, the Innovation Fellows will share their final presentations to the startup community. WilmerHale is a sponsor of this program.
