

The Art of Success - Making Informed Business Decisions

Just like creating a great work of art, creating a successful business requires the proper tools. This seminar series is about gaining information about venture capital, M&A, and IPO's that will help you while you build a business

The first of four seminars is about acquiring financing for your business through venture capitalists. George Taber of Business News New Jersey will moderate a panel which will include participants from New Jersey Technology Council Venture Fund, Venrock Capital, Updata Capital, Hale and Dorr and Deloitte and Touche. The seminar will discuss different views from these panelists about gaining financing in today's market. The panelists will take questions from the audience. Breakfast will be served prior to the panel.

We will wrap up the fourth seminar with a cocktail reception at the Rutgers Museum of Art. This will allow individuals to discuss their work while viewing other works of art.
