

## WilmerHale FinTech Webinar Series: Cybersecurity and Data Privacy

JANUARY 24, 2013

In the past decade, privacy and data security concerns have both created increased risks for and spurred increased regulation of financial institutions, payment processing companies, data brokers, third-party technology service providers, and others in the FinTech sector.

On January 24, WilmerHale Partners Jonathan Cedarbaum, Robert Finkel, and Heather Zachary discussed recent developments that are likely to have the greatest impact on how companies in this sector do business.

[View the Presentation Materials](#)

Topics of discussion included:

- Storage and processing of data in the cloud
- New regulations on mobile devices and apps
- Data security as a national security priority legislation and Executive Branch initiatives
- Data security and corporate governance
- The lawful use of "big data"
- Moving data across borders
