

## World Medical Innovation Forum

BOSTON, MA

Partners HealthCare is proud to announce the 2015 World Medical Innovation Forum, an annual gathering in Boston of more than 1,000 top innovation decision makers. The inaugural event will focus on neurosciences and be held on April 27-29, 2015. Current and emerging approaches to diagnosing and caring for neurologic and psychiatric disorders will be highlighted, including multiple sclerosis, Alzheimer's disease, Parkinson's, depression, schizophrenia, autism, stroke and sleep disorders. Also, game-changing diagnostic tools and therapeutic interventions will be presented, including genome editing, gene therapy, neurostimulation, neuroregeneration, population management, neuroimaging and novel biomarkers.
