## WilmerHale Ranks Among Top Three Life Sciences Law Firms for Second Consecutive Year

MAY 17, 2017

WilmerHale has again been named among the top three Best Life Sciences Law Firms in the Life Sciences Index. The index—launched last year by Lake Whillans and Breaking Media (publisher of *MedCity News* and *Above the Law*)—identifies which law firms are the most active and relevant for life sciences companies. Also included in the Index are top firms by category, in which WilmerHale is recognized as the leading firm for startup work and noted for its "enviable track record of success counseling life sciences companies."

The Index was compiled using the criteria that matter most to healthcare innovators. To generate the index scores, researchers collected data in three practice categories—corporate, intellectual property and regulatory—and incorporated information on firms' work with startup companies and thought leadership contributions.

WilmerHale's [Life Sciences Group](#) was also recently recognized as among the [Top 10 Life Sciences Deal Firms](#) and [Top Thought Leaders in Life Sciences](#) by Breaking Media.
