

The SAVe Act: A Roadblock to Automated Vehicle Innovation

APRIL 4, 2017

In this article published by *Law360*, [Perry Lange](#), [Sarah Licht](#), [Renita Khanduja](#) and [William Desmond](#), discuss the barriers the SAVe Act brings to automated vehicle innovation.

The automobile is poised at an historic inflection point that rivals the introduction of the internal combustion engine over a hundred years ago. Autonomous vehicle technology — currently being developed and tested under real-world conditions by numerous companies both outside and inside the traditional auto manufacturing sector — promises to bring important advances in safety and transportation quality and convenience to U.S. roadways.
